

## MANKIND AND SHORES EXHIBITION

The law of the ocean is to survive and to reproduce in order to maintain your own species. If Man adds to the difficulties, for example by destroying certain habitats, then very few species will remain.

Now **draw** and **write** the actions you would like to undertake in order to preserve the species and their habitats

**All sea creatures are adapted to their habitats. We must preserve their habitats so that we don't reduce their chances of survival.**

## Exhibition – Mankind and Shores

### Marine animals special tricks

Every living creature has found a trick or a special way of behaving in order to survive in the ocean ; it is adapted to its habitat.

During your visit to the exhibition, **look out** for all the living creatures shown in the next section.

When you find them, **write down** their name and the number of the area where they can be found as in the example below.

Then **fill in** the table of adaptations by writing the name of the animal in the correct square. Do this by finding the correct column for adaptation and the right line for its habitats. Take care ! The same creature can appear in several squares.

Area

1

I'm transparent just like water and float with the currents, what am I?

-----

## Adaptation of the marine animals

Whatever the habitat (the rocky sea bed, silty sea bed, sand sea bed, open water, coral reefs, trenches, warm or cold sea...), you will often find similar behaviours. Some creatures may have several different behaviours in order to eat without being eaten.

Area

If you find me, beware of my spines! I feed on seaweeds on the rocks, who am I?

I am a large predator, with several rows of teeth that constantly renew themselves, what am I?

Area

Area

"There is strength in numbers!", that's my strategy. I detect the small fish that I feed on with my barbel, what am I?

I am a member of the shark family and bury myself to hide, what am I?

Area

I live in a pipe or a crack in the rocks and I don't like to be disturbed, what am I?

Area

I hide in the seaweed and I am named after the shape of my head, what am I?

Area

Beware! Private property! I chase the intruders far from my crack in the rocks, what am I?

Area

The sea anemone and I are inseparable. It provides me with a home and defend it against intruders, what am I?

Area

I am transparent and my tentacles are poisonous what am I?

Area

Adaptations Habitats	I go unnoticed	I live in a group	I live with a partner	I am armed	I defend my territory
Open water	Plankton				
Rocky seabed					
Sandy seabed					

I am the same color as the sand so that no-one can see me, what am I?

Area
